

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The primary conversion mechanism on this site is the coverage check, which acts as a gate before any plan or pricing information is shown. This forces users to commit to a qualification step without understanding the product or cost, and the homepage compounds the problem by presenting seven competing CTAs, diluting focus and delaying the path to conversion. The most valuable fix is to make coverage optional and surface plans and pricing upfront, reducing friction and building trust earlier in the journey.

#	Finding	Severity	Effort	PXL
1	Pricing appears only after qualification flow No pricing is shown until the visitor completes the coverage/qualification form, so cost is discovered late...	High	Medium	5/10
2	Value proposition lacks specifics The hero headline promises reliability anywhere but fails to state what is sold or why it is better, leaving...	High	Low	5/10
3	Social proof concentrated on homepage Customer testimonials and press mentions appear only on the homepage and rural-internet page, not on plans...	High	Medium	5/10
4	Heavy third-party script load The homepage loads 65 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
5	Multiple competing primary CTAs Seven distinct calls to action on the homepage create ambiguity about the intended next step, diluting focus.	Medium	Medium	5/10
6	Multiple qualification CTAs compete Multiple qualification and coverage CTAs on the same viewport overload visitors with choices, delaying the...	Medium	Medium	5/10
7	Coverage gate precedes plan selection Users are forced through a coverage check before seeing any plan details or pricing, adding an unnecessary...	Urgent	Medium	4/10
8	Duplicate coverage form on page The coverage check form appears twice on the same page, forcing visitors to encounter duplicate interaction...	Medium	Medium	4/10

#	Finding	Severity	Effort	PXL
9	Inconsistent price formatting across pages Price display formats vary across plan pages (e.g., '/month' vs 'one-time', inconsistent currency...	Medium	Medium	4/10
10	Guarantee signal lacks placement context A confidence-related heading exists on the rural-internet page but no equivalent appears on the plans pages...	Medium	Low	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
